

Registrerade bedlingtonterrier åren 2011 - 2026 med DNA-resultat för koppartoxikos

Samtliga hundar med DNA-resultat är hundar som testats av SLU enligt DNA-testet för koppartoxikos, från början markörtest och numera med gentesten COMMD-1, och som kommit SKBK till kännedom genom inskickade resultat.

Vi ser gärna att uppfödare och medlemmar kompletterar listan med fler DNA-resultat. Skicka en kopia på hundens DNA-resultat till Lena Lidsell, [lena.lidsell@telia.com](mailto:lana.lidsell@telia.com)
Det går bra att ta bild med mobilkameran.

Om något fel hittas i DNA-listan är vi tacksamma om ni meddelar detta till ovan angiven mailadress, så att vi kan hålla listan uppdaterad.

Listan är sammanställd av Karolina Lidsell och kontrollerad mot inskickade DNA-resultat av Mimmi Naartjärvi maj/juni 2012.

”Det är varje tik- och hanhundägares ansvar att kontrollera hundarnas DNA-resultat innan parning. SKBKs Avelskommitté kan hjälpa till med eventuell tolkning av DNA-resultat utifrån hundarnas stamtavlor”. (Styrelsebeslut 2013-04-01)

Listan är reviderad 2026-04-22. Nya testresultat är markerade med rött. /Lena Lidsell
